

# eyespots *(eye-spots)*

## Definition

plural n. Simple visual organs found in some invertebrates, consisting of a cluster of photoreceptor cells that can detect light but not form images.

## Example Sentence

The caterpillar had **eyespots** on its back to scare away predators.

## More Example Sentences

Some marine animals have **eyespots** to help them detect changes in light.

## Synonyms

ocelli; photoreceptors; light sensors

## Antonyms

blind spots; darkness; invisibility
