

lymph system *(lymph-sys-tem)*

Definition

n. A network of tissues and organs that help rid the body of toxins, waste, and other unwanted materials. The primary function of the lymphatic system is to transport lymph, a fluid containing infection-fighting white blood cells, throughout the body.

Example Sentence

The **lymph system** plays a crucial role in maintaining the body's immune defenses.

More Example Sentences

Doctors often check the **lymph system** for swelling to detect infections.

Synonyms

lymphatic system; immune system; lymphoid system

Antonyms

circulatory system; respiratory system; digestive system
